

### **ILFORD GALERIE GRAPHIC Media compatible with HP Latex Technology**

Designed with the environment in mind, HP Latex Printing Technologies offer print service providers (PSPs) a compelling new printing alternative for a wide variety of outdoor and indoor applications. Together, HP Latex Inks and HP Thermal Inkjet Technology provide durable, odourless prints; sharp, vivid image quality; application versatility; and high productivity – all of which enable PSPs to increase their print capacity and grow their businesses while reducing the total impact of printing on the environment

HP Latex Printing Technologies can produce a broad range of applications, from point-of-purchase displays, transit signage, wall murals and exhibition graphics to billboards, and event signage. Prints produced with HP Latex Inks achieve display permanence up to three years un-laminated and are scratch, smudge and water resistant on a range of media.

The following ILFORD GALERIE GRAPHIC media have been evaluated and approved as compatible with HP Latex Printing Technologies for indoor use:

- Satin Photo RC Paper (200gsm), IGXSP8
- Glossy Photo RC Paper (200gsm), IGXGP8
- Satin Photo RC Paper (250gsm), IGXSP10
